Gambaran Keseluruhan

Pada 2024^P, pasaran sewa pejabat mengalami keadaan yang bercampur-campur. Permintaan untuk ruang pejabat yang moden, mampan dengan pensijilan hijau serta mempunyai kemudahan yang berkualiti tinggi meningkat, didorong oleh tumpuan kepada kesejahteraan pekerja dan kecekapan tenaga.

Walau bagaimanapun, ketidaktentuan ekonomi global menyebabkan perniagaan lebih berhati-hati dengan komitmen sewa jangka panjang seterusnya melembapkan keseluruhan aktiviti pasaran. Ditambah pula dengan norma bekerja dari rumah dan peningkatan ruang kerja bersama, telah membentuk semula keperluan pejabat.

Lebihan penawaran pejabat terutamanya di bandar utama telah memberi tekanan menurun kepada kadar sewa terutamanya bagi bangunan lama atau bangunan yang kurang kompetitif. Kemunculan bangunan baharu yang menawarkan pakej tawaran sewa yang kompetitif telah menarik penyewa dari ruang lama ke ruang yang lebih baru seterusnya memperlakukan pemuliharaan dalam segmen ini.

Indeks Sewaan Pejabat Binaan Khas (PBO-RI – milik persendirian) di bandar-bandar utama menunjukkan sedikit peningkatan pada 2024^P, dengan Lembah Klang dan George Town merekod pertumbuhan sederhana sebanyak 0.2% setiap satu, pulih daripada penurunan masing-masing sebanyak -0.5% dan -0.2% pada 2023. Johor Bahru pula mengekalkan kadar pertumbuhan seperti tahun sebelumnya sebanyak 0.1%.

Berbanding dengan tahun asas 2010, Indeks sewaan bagi Lembah Klang berada pada 130.4 mata, diikuti oleh Johor Bahru pada 130.2 mata, dan George Town pada 126.7 mata. Purata kadar sewa pula direkodkan pada RM48.38 s.m.p. di Lembah Klang, RM34.23 s.m.p. di Johor Bahru, dan RM31.10 s.m.p di George Town.

Overview

In 2024^P, the office rental market experienced mixed conditions. Demand for modern and sustainable office spaces with green certifications and high-quality amenities increased, driven by a focus on employee well-being and energy efficiency.

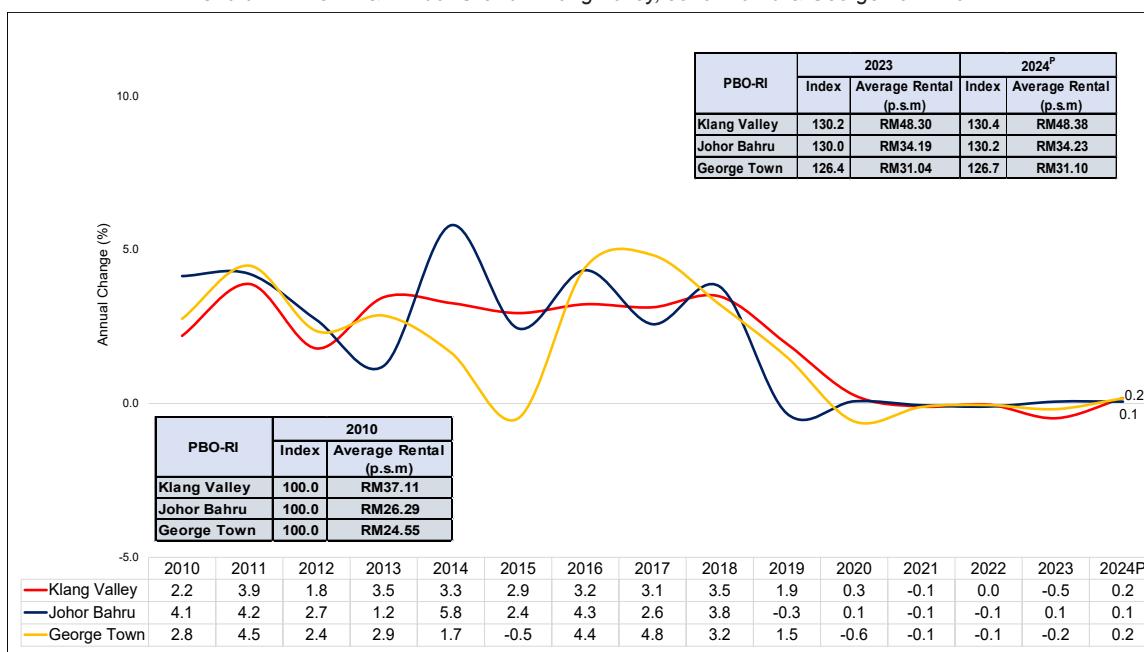

However, global economic uncertainty led businesses to exercise caution with long-term rental commitments, dampening overall market activity. Coupled with evolving work-from-home norms and the rise of co-working spaces, reshaping office needs.

Oversupply of offices, especially in major cities, puts downward pressure on rental rates, especially for older or less competitive buildings. Meanwhile, new entrants offering amenities with rental packages are pulling tenants away from older spaces, further slowing the recovery in this segment.

The Purpose-Built Office Rent Index (PBO-RI – privately owned) in major cities showed a slight improvement in 2024^P, with the Klang Valley and George Town recording a modest growth of 0.2% each, rebounding from declines of -0.5% and -0.2% in 2023, respectively. Johor Bahru maintained its previous year's growth rate of 0.1%.

Compared to the base year of 2010, Klang Valley rental index stood at 130.4 points, followed by Johor Bahru at 130.2 points, and George Town at 126.7 points. Average rental rates were recorded at RM48.38 p.s.m. in the Klang Valley, RM34.23 p.s.m. in Johor Bahru, and RM31.10 p.s.m. in George Town.
